

PRESS RELEASE FOR IMMEDIATE RELEASE

NEW : KARIBA PORTABLE GAS SYSTEMS *The World's Smallest All-In-One Hot Showers & Camp Stoves*

SALT LAKE CITY, Utah – June 1, 2017 – Equipt Expedition Outfitters, the industry leader in high-quality, vehicle expedition equipment, is proud to join forces with another South African powerhouse--Kariba--as their exclusive U.S. distributor. Lightweight, compact, and easy-to-use, Kariba Portable Gas Systems offer on-demand hot water for showering, with some models also doubling as a camping stove.

Quick to setup, easy to ignite, and compatible with both off-the-shelf brands of butane and propane, Kariba Portable Gas Systems can raise ambient water temperatures to more than 82°F (28°C), making them an efficient hot shower system for adventurers whose travels have space and weight limitations. Carry it, hang it, or set it on a surface, these versatile units are the perfect addition to any overland or camping loadout kit. All systems come complete, requiring only water and gas to function.

There are four models available:

1. Explorer Single Burner Hot Shower System : The smallest and most simplistic model available.
2. Nomad Single Burner Hot Shower & Cooker System : Sharing the same body-size and features as the Explorer, the Nomad features an additional grill platform that transforms the unit into a single burner cooker.
3. Xtreme Dual Burner Hot Shower System : The most robust size available.
4. Ranger Dual Burner Hot Shower & Cooker System : Sharing the same body-size and features as the Xtreme, the Ranger features an additional grill platform that transforms the unit into a dual burner cooker.

We knew these would be an instant hit at Overland Expo West this past month, but we didn't expect to sell out completely during their initial launch! But this works in your favor. We're offering all customers the chance to **pre-order any Kariba Portable Gas System with FREE domestic shipping**. Estimated delivery is July.

Kariba also offers a variety of on-the-go Shower Kits, which come in a variety of sizes and feature German-engineered submersible pumps. Please note that these do not include a water heating system. These units are available for purchase now.

Contact sales@equipt1.com to place your pre-order.

Model shown is Kariba Ranger Dual Burner Hot Shower & Cooker System
