D.I.Y. Kits for fitment to 4x4 Camper Vehicles & Trailers

PRODUCT DISCRIPTION: Kariba – Camper 5.5L D.I.Y. Kit

This fully automatic gas water heater is a perfect option for campers and off-road adventurers who have young families and who enjoy a home comfort shower in the bush. The Camper 5.5L (Now with carry handle fitted) is small in size and can be fitted into a camper vehicle or trailer. It features the latest gas powered technology, made for general ablution purposes use outdoors and indoors in well ventilated areas. Some of the safety features include automatic overheating sensor shutoff, electronic ignition powered by two "D" Cell batteries. When the water is turned on the gas flame is ignited automatically, and when the water is turned off the gas is turned off and the flame is extinguished. The Camper 5.5L has a maximum water flow rate of 5 liters per minute, and can be connected directly to a hose from a tap, or to the hose of the supplied German made 12V DC 4.1L quality submersible pump kit that delivers 3.8 L (approx. 1 Gallon) p/minute. A stronger 5.5L pump is available on a quotation request. The pumps are powered from a 12V cigarette lighter of a vehicle and are the only pumps that can fit into the cap of a 20L water Jerry Can. Water temperature can be controlled from the water flow and flame height controls, both of which are located on the front panel of the appliance. This appliance is safe for use by adults in accordance with the instructions supplied, and minors under adult supervision. The body is coated in a black egg shell or dark charcoal grey and constructed from electro galvanized sheet metal. The appliance is guaranteed for a period of six months against faulty workmanship or defective parts, fair ware and tare excluded. The quality submersible pump is guaranteed for 12 Months from date of purchase. Both of these are subject to the terms and condition as noted in the Operating Manual and Quality Assurance Certificate supplied with the appliance. As this appliance is powered by gas, responsible operation is advised.

APPLIANCE SIZE (Approx.) Height 400mm x Width 300mm x Depth 150mm **NB:** Space must be allowed for all-round ventilation.
