Xtreme 4x4

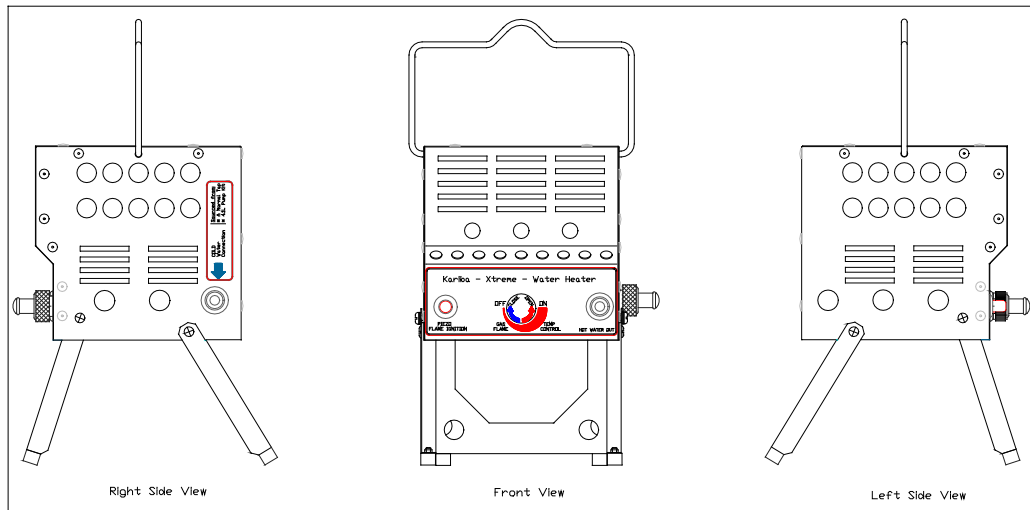

Manual Control - Water Heater – For Expedition & Outdoor Camping

HOT Camp Shower – Featuring User Friendly Dual Gas Options

Kariba: Model - Xtreme 4x4 Patent Pending
Expedition Water Heater System

This unique gas appliance is the ultimate choice for water heating on demand available to campers and extreme adventures. **Kariba - Xtreme 4x4** is small and light in weight, designed and manufactured to be used independently as a mobile outdoor shower and ablution facility, supplied complete with only water and gas required. The appliance features a compact and robust stainless steel design with twin high pressure gas burners fitted to deliver an infinitely controlled rising of ambient water temperature by approximately 30(C) 86(F) through the copper coils heat exchanger delivering hot water up to a maximum of 60(C) 140(F). All auxiliary connections are “Plug & Play”, and the appliance can be operated standing upright, hung from a tree or a roof rack of a vehicle, or can be fitted into a camper trailer or off-road vehicle door panel for example. This appliance is supplied complete with a quality 12V DC 4.1L German engineered submersible pump that delivers 3.8L (approx.1 Gallon) water flow p/minute at a head height of 2 Meters (approx. 6Ft.6”) and which includes a hand held shower with water flow restrictor, hoses and all the quick connectors required for this system. The exclusive pump is the only one in the world that fits into a standard 20L (5 Gallon) steel water “Jerry Can” including containers with a minimum of 50mm (2”) nozzle. The complete appliance is guaranteed to work when required and has a warranty for a period of six months against faulty workmanship or defective parts, fair ware and tire excluded, subject to the terms and condition of our “Limited Warranty” included in the operation manual and printed on the reverse side of “QA” Certificate enclosed in the package.

Kariba- Xtreme 4x4 – Standard Package Contents:
